

How to use the Strayacoin full-node wallet on Windows 7+

Pre-Requisites

1. A computer running Windows 7 or later
2. A stable internet connection with at least 1 gigabyte of data
3. 10 gigabytes of free C drive space

Downloading the wallet

To download the Strayacoin full node wallet, navigate to <https://github.com/StrayaCoin/StrayaCoin-Core/releases> and download the latest wallet by clicking on the asset with the zip file extension.

The screenshot shows the GitHub repository page for StrayaCoin-Core. The main heading is 'Strayacoin Windows 64 bit Core Full Node Wallet v1.2.1.1', released by DaveTheKeyMaker on Feb 16, 2019. The page includes a 'Releases' tab and a list of assets. The asset 'strayacoin.core.1.2.1.1.zip' is highlighted in yellow. Below this, there is a section for 'StrayaCoin QT MacOS 10.13 High Sierra' also released by DaveTheKeyMaker on Feb 16, 2019. The page also shows navigation options like 'Code', 'Issues', 'Pull requests', 'Actions', 'Projects', 'Wiki', 'Security', and 'Insights'.

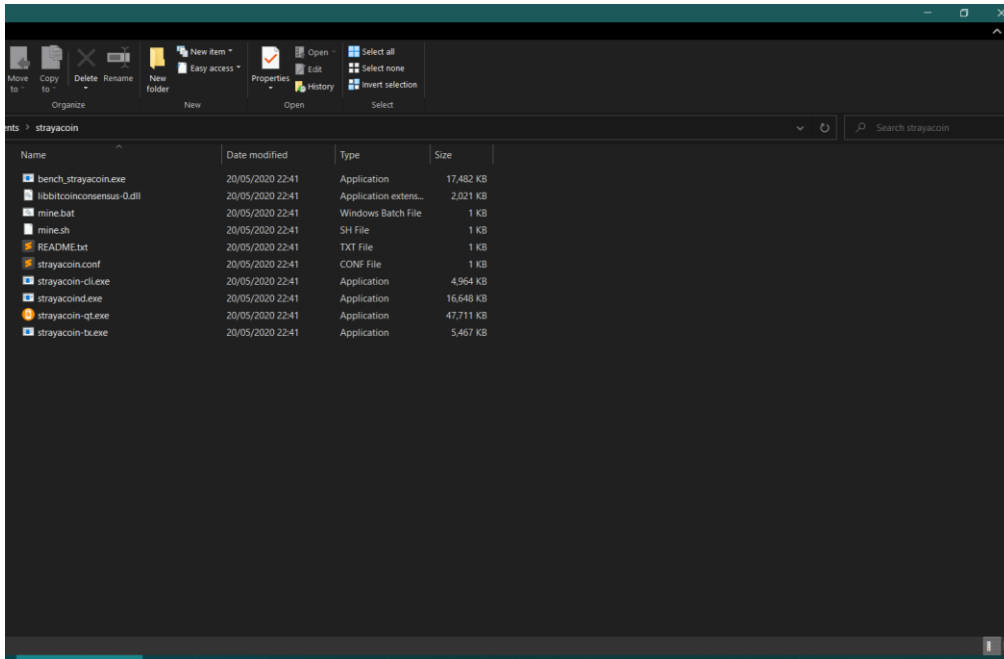

The zip file should now be in the downloads folder on your PC.

Installing the wallet

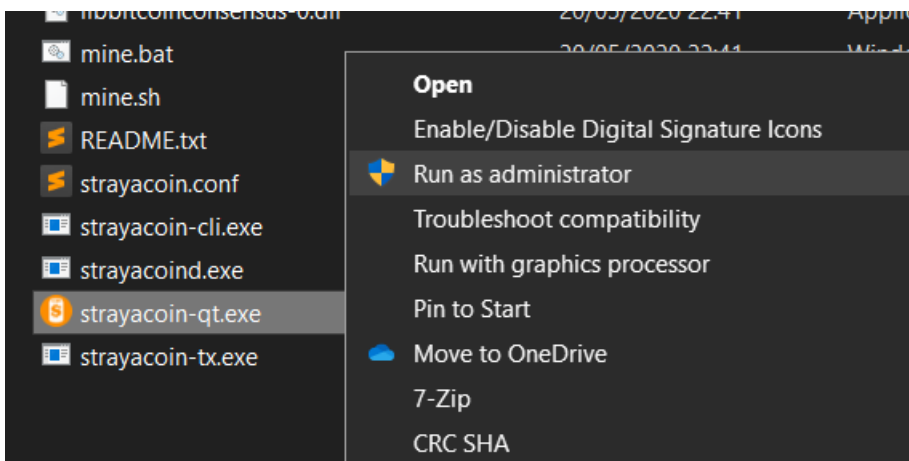

To install the wallet, create a new folder in a safe location on your PC, extract the zip file to that folder by right clicking inside the open archive and then clicking the extract all button, making sure the location for files to be extracted to is the folder you just created.

How to use the Strayacoin full-node wallet

You should now have a folder that looks like this:

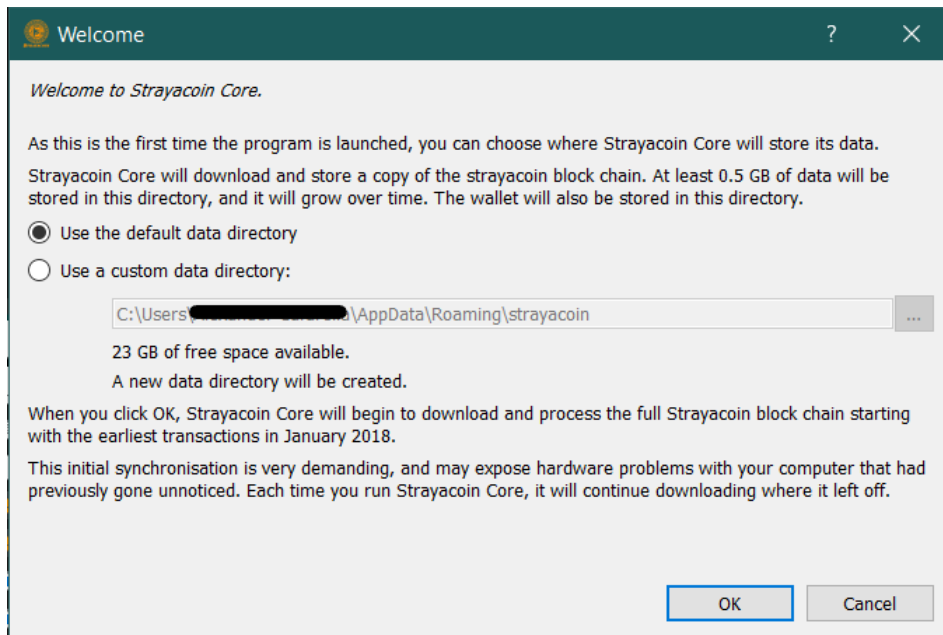

Right click on “Strayacoin-qt.exe” and click “Run as Administrator”

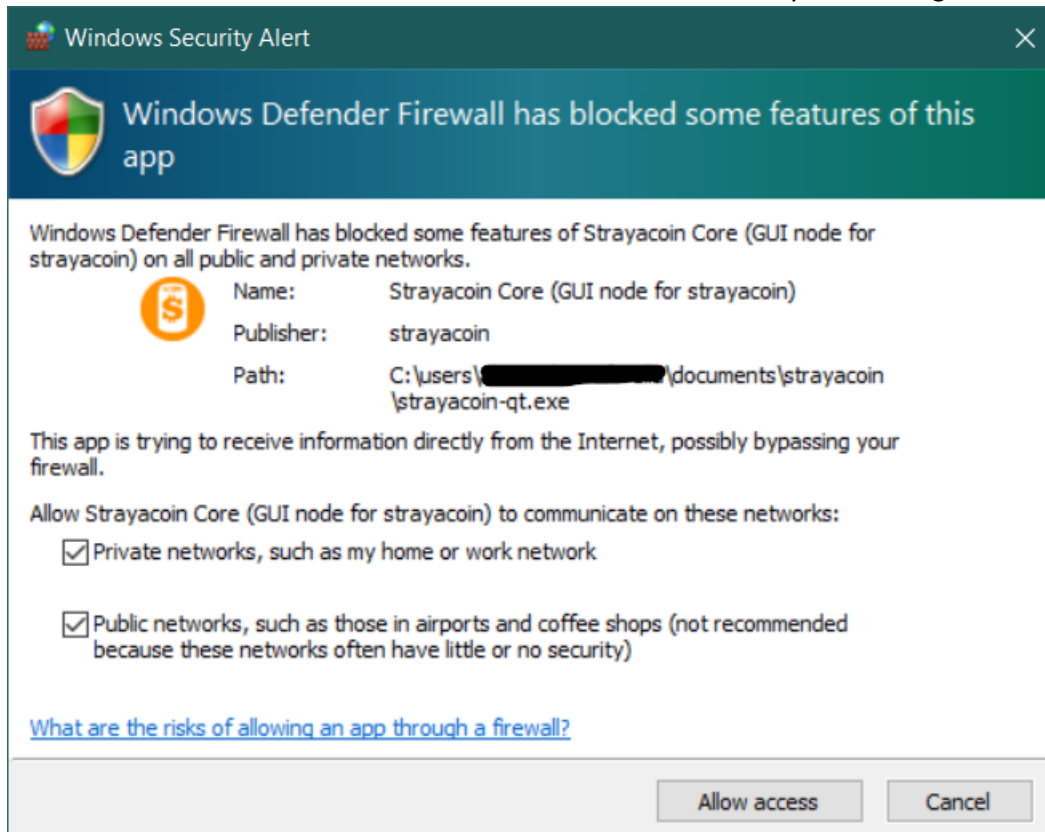

Click yes to the User Account Control prompt

Once the Welcome dialog opens, click OK to use the default data directory.

How to use the Strayacoin full-node wallet

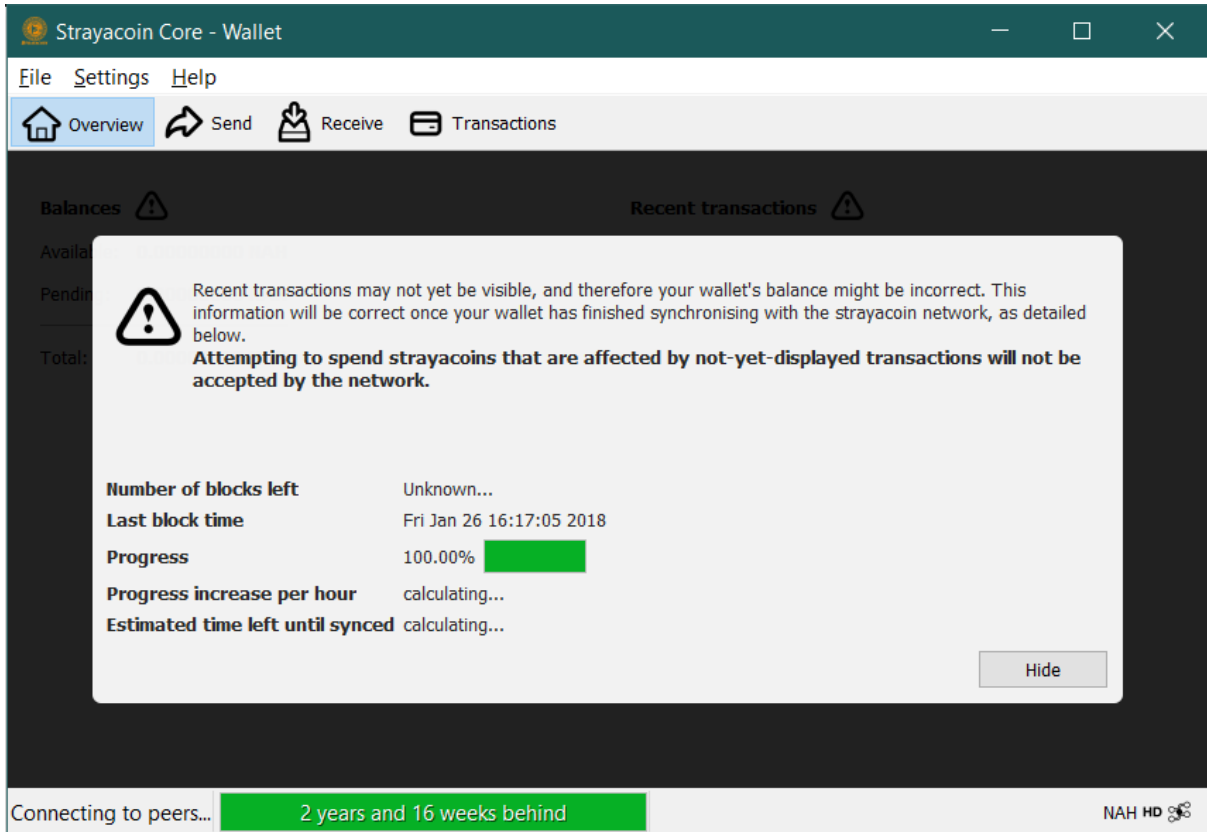

Then click allow access on the Windows Defender Firewall Security Alert dialog.

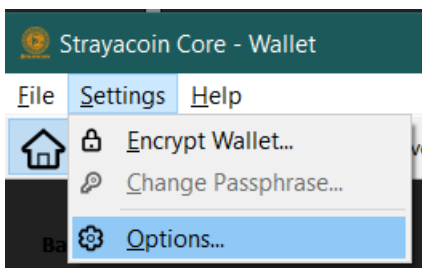

How to use the Strayacoin full-node wallet

Now the Strayacoin wallet application should have opened.

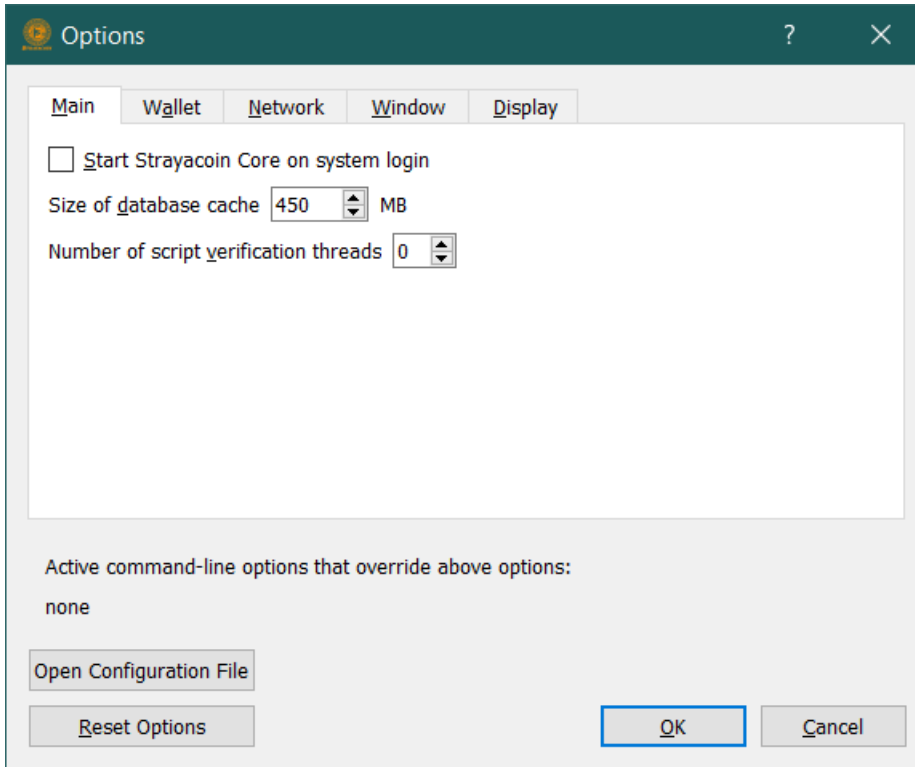

Now we need to make a configuration file.

In the Strayacoin Core Wallet application, navigate to settings, options, main

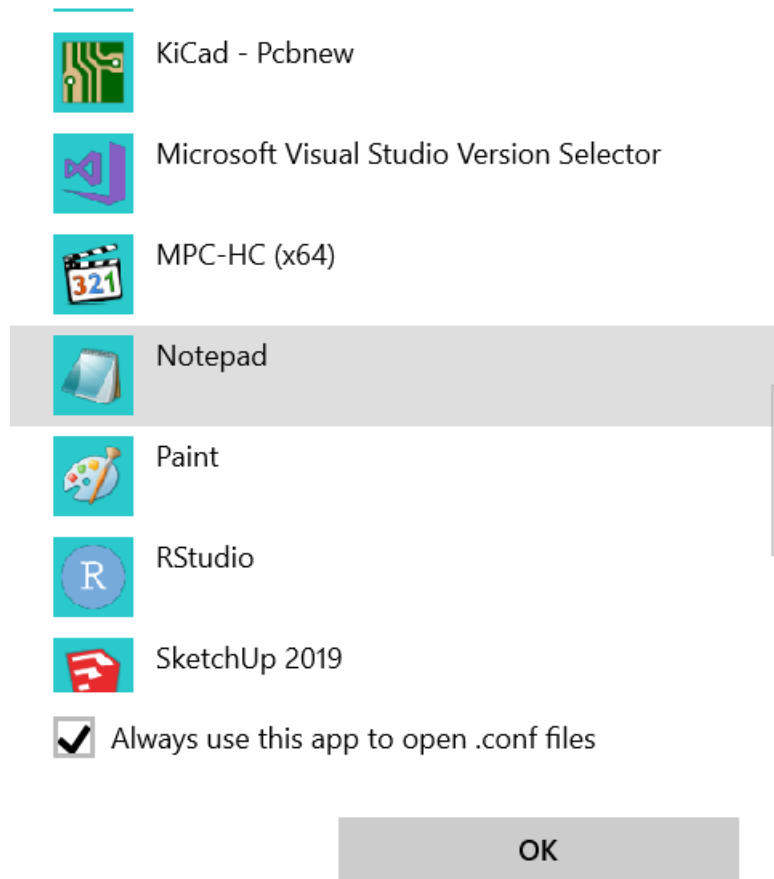

How to use the Strayacoin full-node wallet

How to use the Strayacoin full-node wallet

In the bottom left hand corner, click “Open Configuration File” and then OK to the warning dialog. A dialog like this may appear, click Notepad, and then OK.

How do you want to open this file?

Copy and paste what is between the quotes into the notepad window that has just opened:

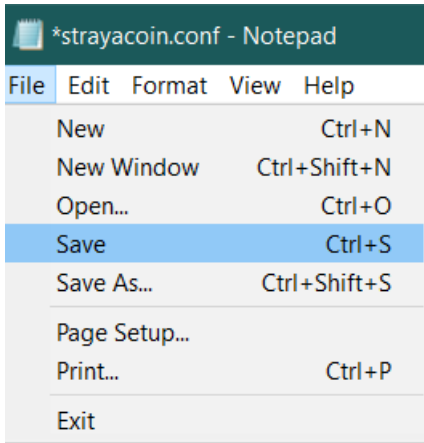

“

```
addnode=103.1.186.134:9666
addnode=139.99.182.230:9666
addnode=144.217.73.92:9666
addnode=45.40.163.96:9666
addnode=45.77.234.14:43584
addnode=51.83.3.42:9666
server=1
rpcuser=yourusername
rpcpassword=whateveryouwant
rpctimeout=30
rpcallowip=127.0.0.1
gen=1
4way=1
paytxfee=0.001
```

“

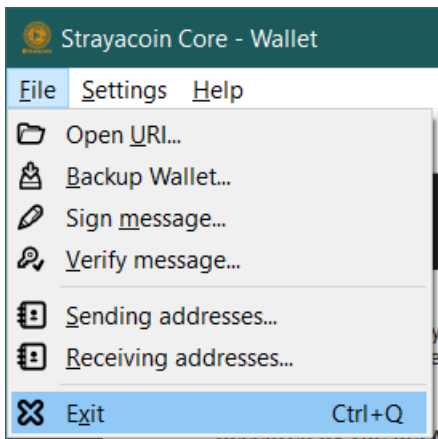

How to use the Strayacoin full-node wallet

Then Click File, Save

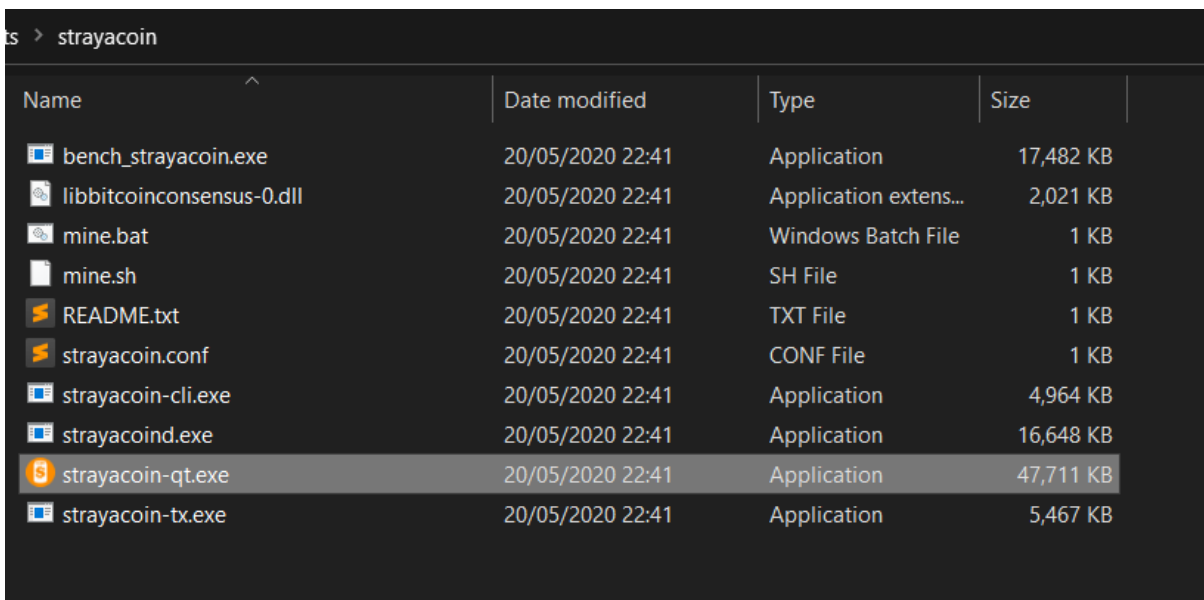

Exit Notepad.

Back in Strayacoin Core, click File, Exit. Strayacoin may take up to 2 minutes to close.

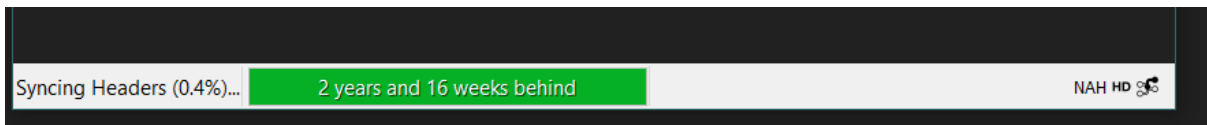

Reopen Strayacoin by double clicking on "strayacoin-qt.exe" in the folder with the Strayacoin client inside.

How to use the Strayacoin full-node wallet

Strayacoin will start syncing headers. This process can take up to 1 hour, depending on your internet connection, usually this will only take 10 mins. This is a good chance to crack open a cold one or brew a tea, you deserve it.

Once the headers have been synced, Strayacoin will now know what blocks to download, this process will take a long time, possibly hours, as it must download 2 years of blockchain data which is approximately 500 megabytes.

On the positive side, you now have a progress bar to watch whilst you ponder your financial decisions. Before you start yelling at the person who made you do this, note that you can do other things in the background.

Once the wallet has synced, there should be a small tick in the bottom right hand corner

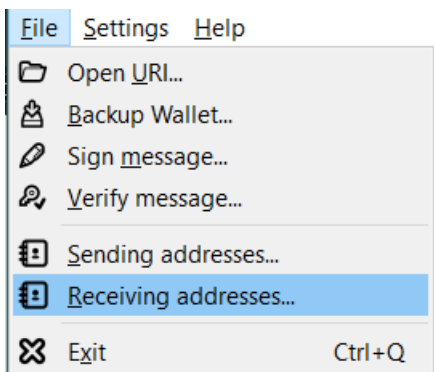

You have now installed Strayacoin!

Addresses

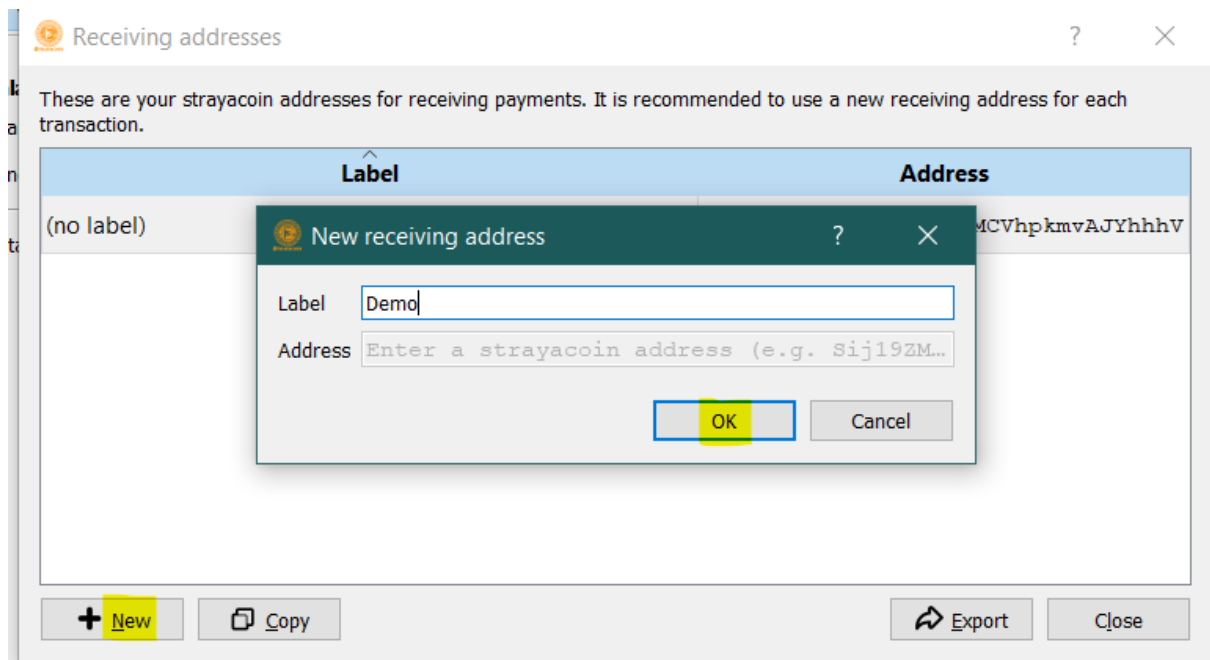

We now must create a new receiving address, so we can receive payments.

File, Receiving addresses

New, enter a label and click OK.

How to use the Strayacoin full-node wallet

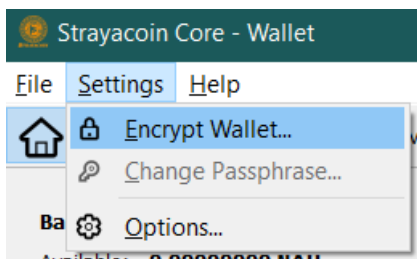

We now have a new address we can use. To receive Strayacoin, copy the address and give it to the sender.

Public and private key backup

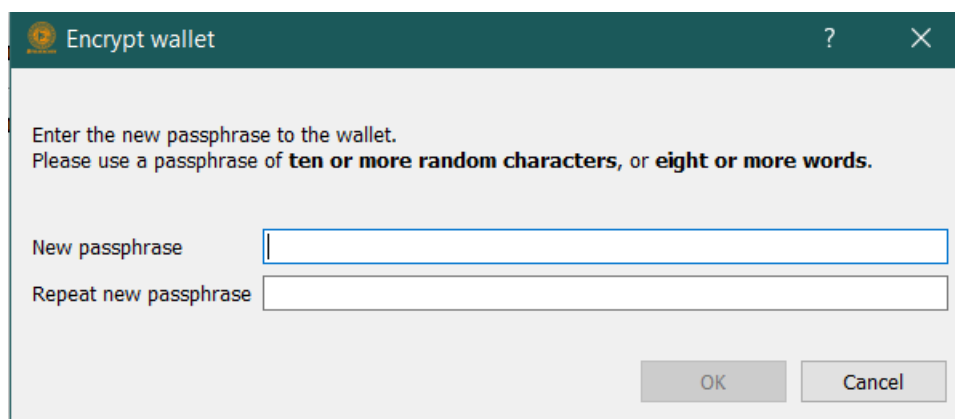

We should now encrypt and take a backup of the wallet.

To do this, navigate to Settings, Encrypt Wallet.

Enter a passphrase that meets the complexity requirements and click OK

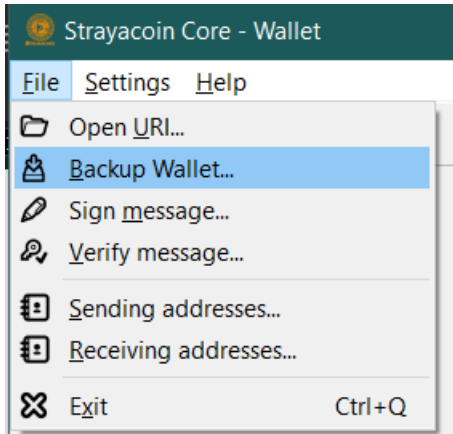

WARNING: IF YOU LOSE THE PASSPHRASE, YOUR WALLET WILL BECOME USELESS, PRIOR BACKUPS WILL NOT WORK EITHER

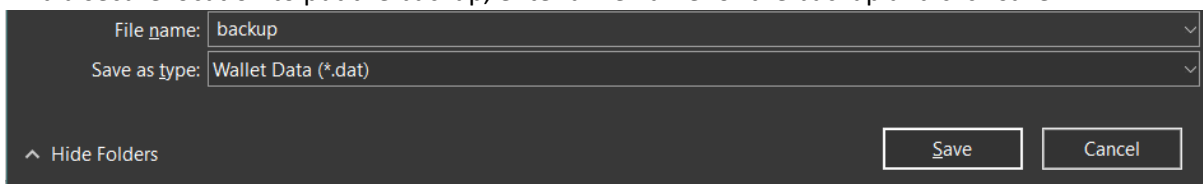

Restart Strayacoin. Your wallet will now be encrypted.

How to use the Strayacoin full-node wallet

We now must take a backup of the wallet, to do that, go to File, Backup Wallet

Find a secure location to put the backup, enter a file name for the backup and click save.

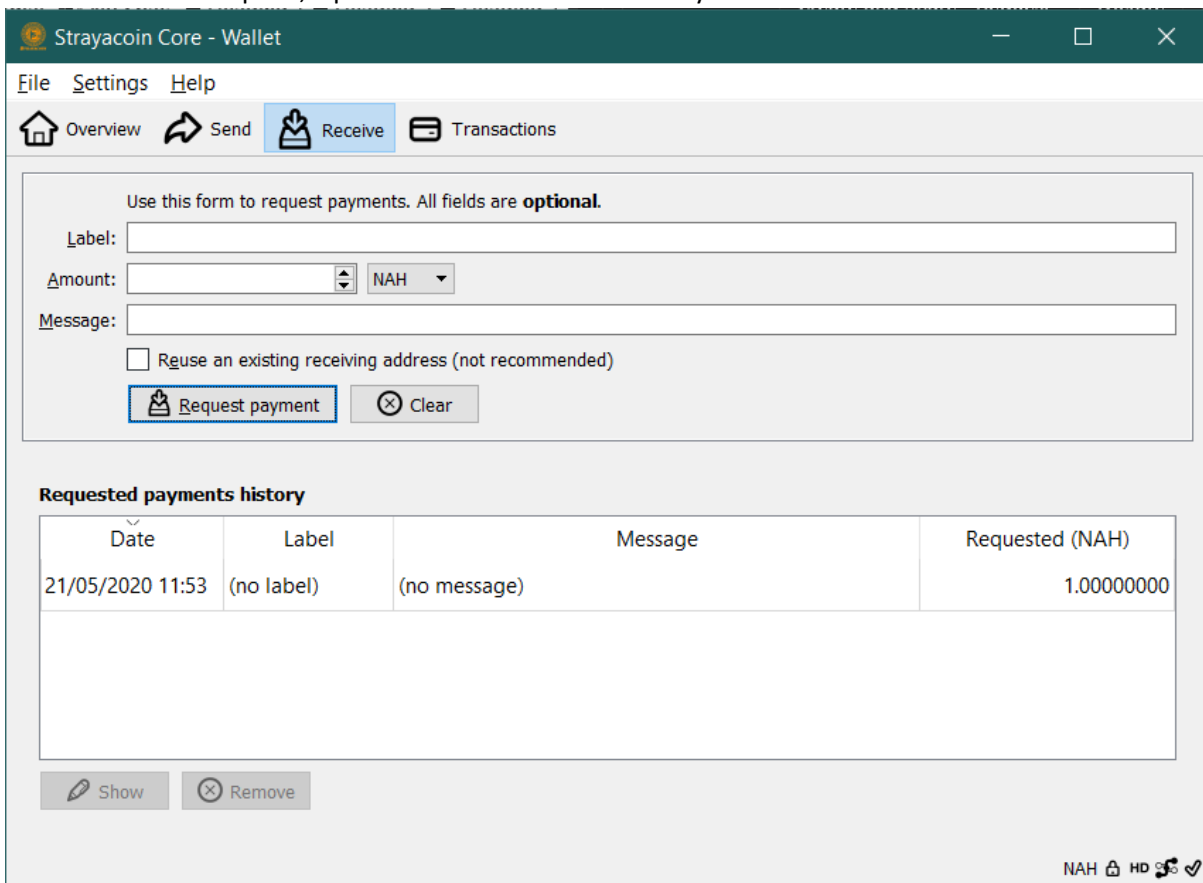

You have now got a backup of your wallet.

Sending and receiving Strayacoin

Strayacoin is automatically received from the blockchain if you have been sent any.

To create a send request, Open the receive tab in the Strayacoin wallet

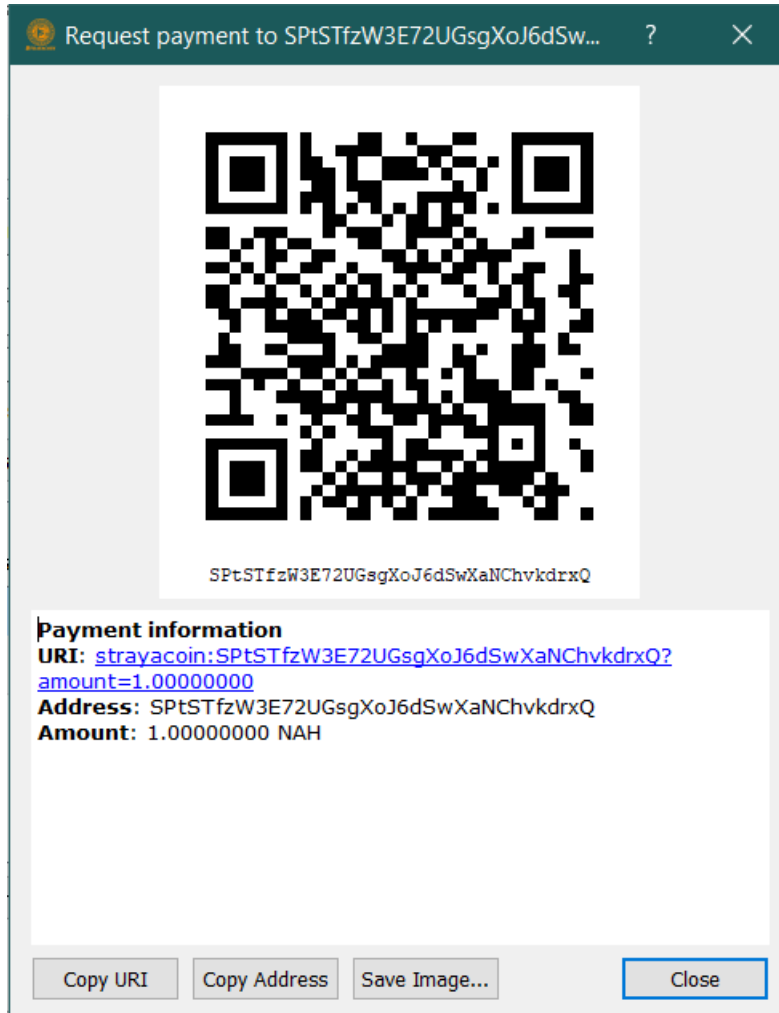

How to use the Strayacoin full-node wallet

Enter the label, amount, and message.

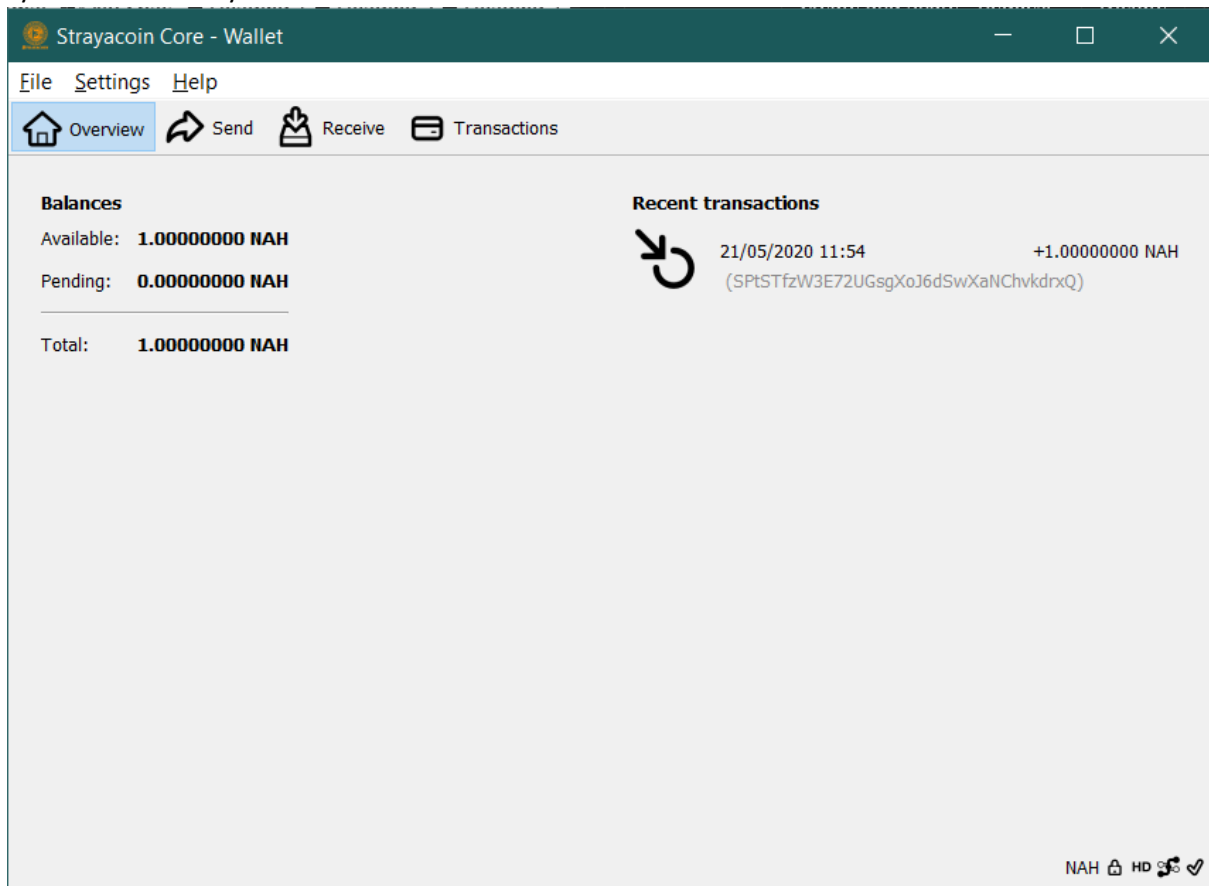

Then click “Request Payment”

Share the URL and QR code window that opens with your friends by clicking the copy buttons at the bottom of the window, so they can send you some Strayacoin

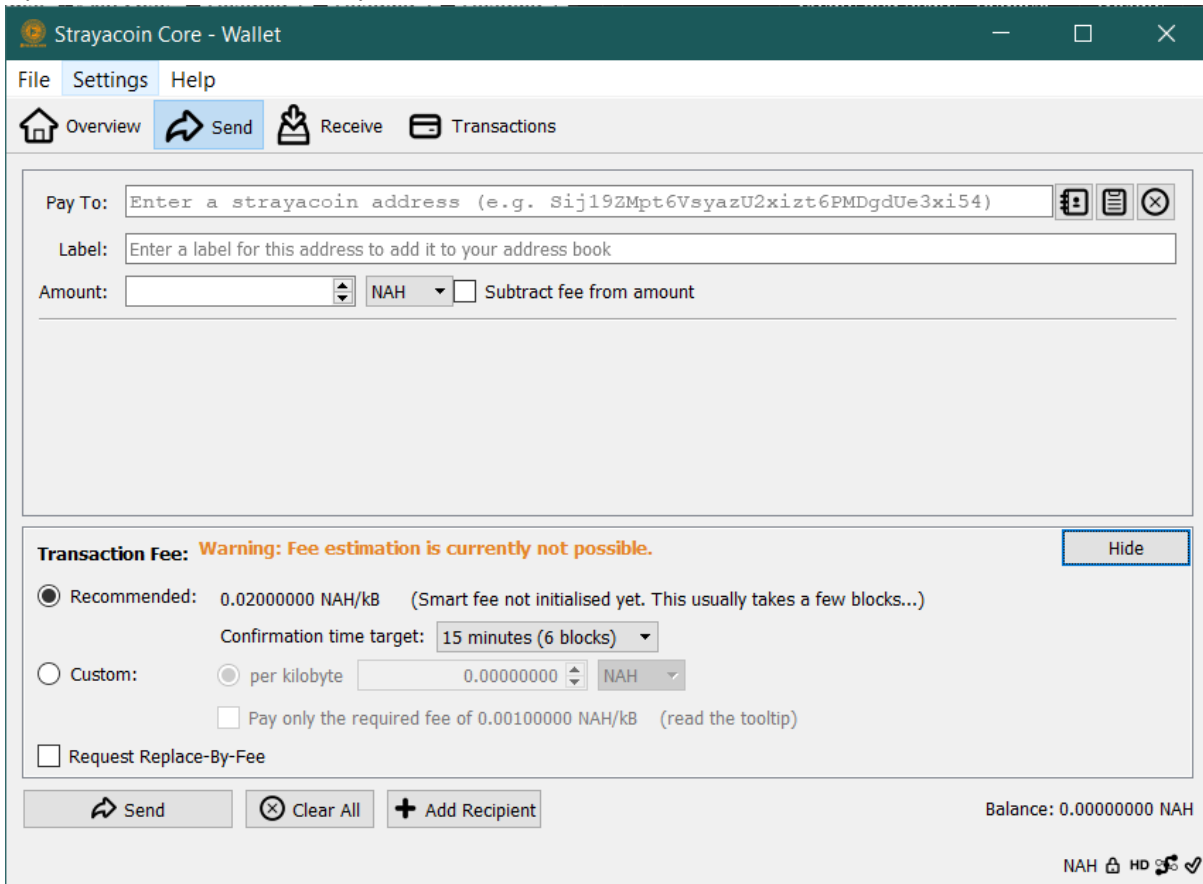

How to use the Strayacoin full-node wallet

Once you have received Strayacoin, it will automatically appear in your wallet as the blockchain syncs automatically

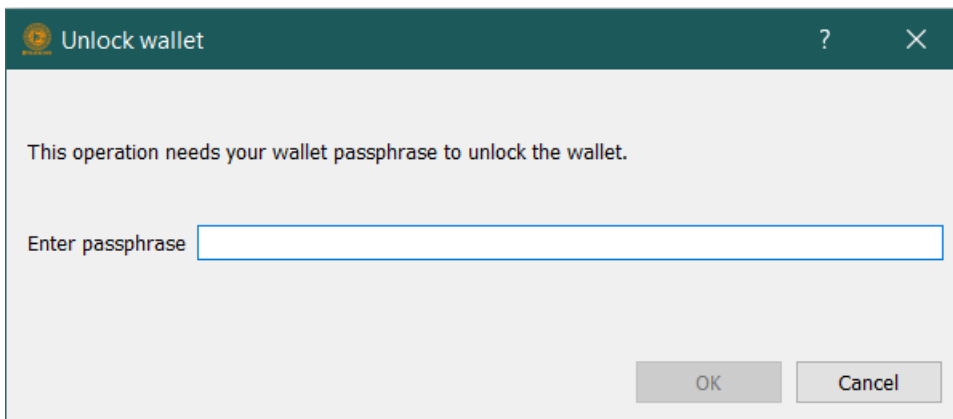

To send someone Strayacoin:

Open the send tab in the Strayacoin wallet

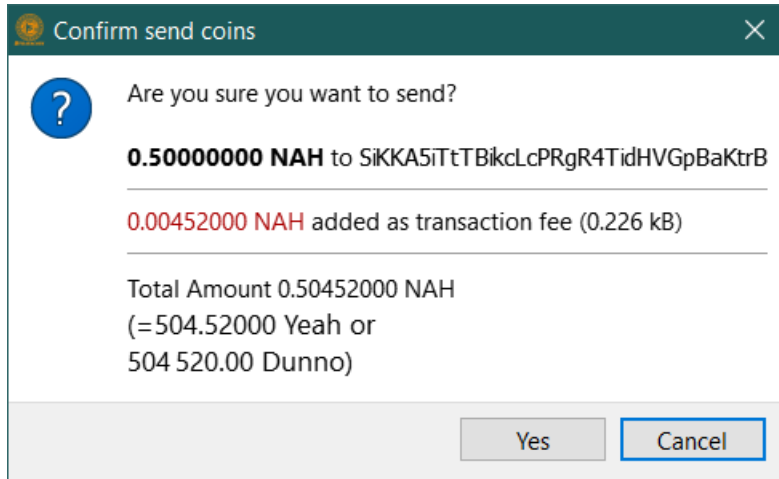

Enter the address they give you, choose the amount you want to send, click recommended for transaction fee, then click send.

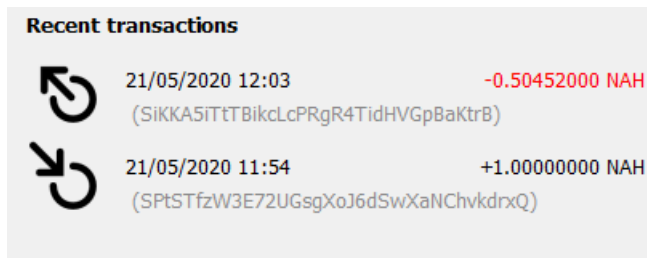

Enter your wallet passphrase when prompted

Click Yes on the confirmation dialog

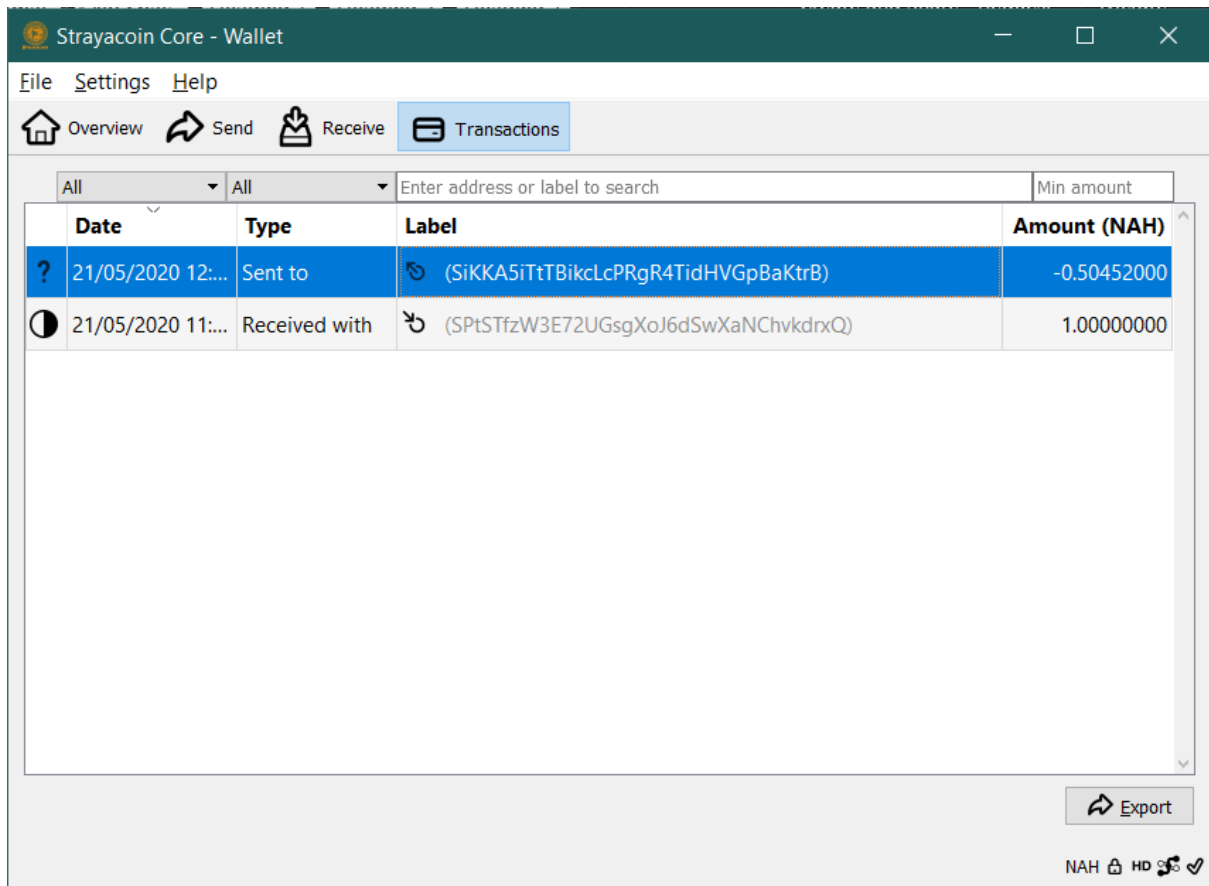

Your transaction will be sent through the blockchain and will now appear in your recent transactions.

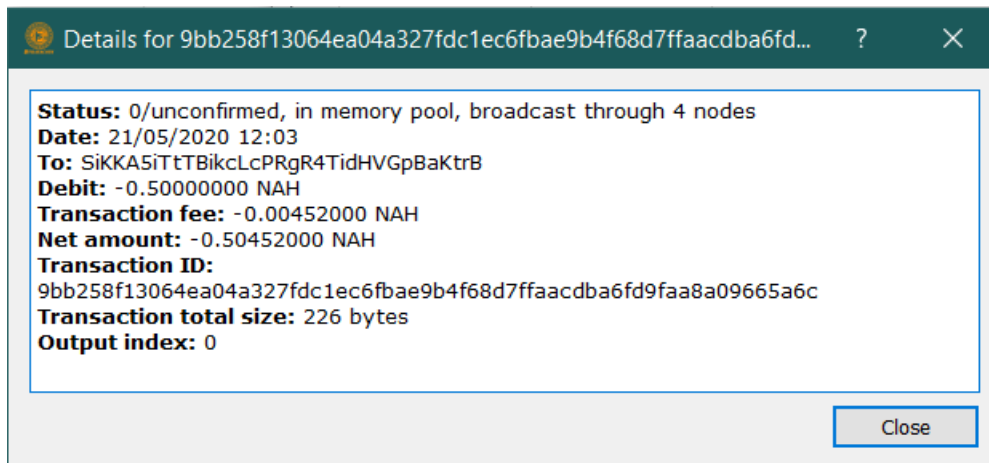

To view recent transactions, open the Transactions tab on the top bar

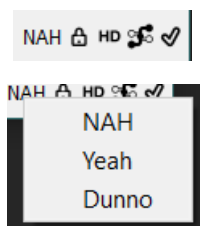

How to use the Strayacoin full-node wallet

To see a transaction, double click the transaction to view the details

To change currency decimal the wallet is displayed in, click the NAH/YEAH/Dunno button in the bottom right hand corner.

Hover over the other icons to see what they mean
